

METHOD AND APPARATUS FOR PROVIDING CONTENT

ABSTRACT OF THE DISCLOSURE

A system, method, apparatus, and computer program code for providing content.

One or more content segments can be identified or selected based on an attribute (e.g.,
5 age, location, occupation) of a person. In addition, one or more devices (e.g., computer,
cellular telephone, personal digital assistant) associated with the person may be identified
or selected. One or more of the content segments can be provided to one or more of the
devices for further use or transmittal by the person. The person may transmit or
otherwise send one or more of the content segments to people within a localized area or
10 who ask or desire to receive the content segments. In some embodiments, a person may
be compensated for receiving and/or broadcasting a content segment.
